

UTTKARSH SHARMA

Boston, MA | +1 (617) 594-7807 | sharma.utt@northeastern.edu | linkedin.com/in/01uttkarsh | portfolio-uttkarsh.lovable.app

Product Management | AI & Data Products | Enterprise Operations Background

SUMMARY

Two years answering enterprise monitoring alerts. Now building the products that handle them. Four product projects and graduate product coursework since, spanning AI tooling, experiment design, user research, and product requirements.

EDUCATION

Northeastern University

Boston, MA

M.S., Engineering Management | GPA: 4.0 / 4.0

Expected May 2028

Coursework: Probability & Statistics, Deterministic Operations Research | Fall 2026: Digital Product Design & Management, Advanced Product Management

Nitte Meenakshi Institute of Technology

Bengaluru, India

B.E., Electrical and Electronics Engineering

2023

Coursework: C, C++, Fundamentals of AI, Introduction to Cyber Security

SKILLS

Product & Research: Customer discovery, user interviewing, competitive analysis, RICE prioritization, product requirements writing, roadmap sequencing

Data & Experimentation: SQL, Python (pandas), Power BI, Google Analytics 4, A/B test design, regression & ANOVA, cohort and retention analysis

AI & Automation: LLM API integration (Claude API), prompt design, Python automation, linear programming (scipy.optimize)

Enterprise Operations: ServiceNow, Splunk, LogicMonitor, incident and problem management, root cause analysis, escalation design, cloud infrastructure, RBAC

Collaboration: Cross-functional facilitation, stakeholder communication, technical translation, Agile/Scrum (Jira), Figma, Git/GitHub, Excel

PROJECTS

Luminary — AI Research Collaboration Platform

Protothon 8.0 · Mar 2026

Team Lead · React/Vite, FastAPI, Pinecone, scikit-learn, Groq/Llama-3.3-70B · luminary-lovat.vercel.app

- Led a 4-person team to 1st place of 50 teams; ran discovery interviews with PhD researchers at 3 universities to validate 5 failure modes.
- Prioritized scope via RICE against Elsevier SciVal and Clarivate InCites; cut P2P messaging (53) as a communication rather than search fix, favoring RAG search (146) and QAOA matching (91).
- Defined technical scope with the engineering team for semantic retrieval and complementarity matching across 6 simulated federated nodes; team's matching model reached $R^2 = 0.85$ on sample data.

Spotify Social Layer — Product Case Study

Apr 2026

Figma, PRD · portfolio-uttkarsh.lovable.app

- Interviewed 4 users and parsed Spotify's Q1 2026 shareholder deck (483M free at 13% margin vs. 293M Premium at 34.8%) to locate a monetization gap.
- Specified a 3-feature social layer across 5 Figma screens and a PRD defining activation and free-to-Premium conversion metrics.

Gate Placement Experiment — A/B Test & Retention Analysis

Jun 2026

SQL, Python (pandas), Power BI

- Evaluated a 90,000-user two-arm test on gate placement; the later gate cut 7-day retention rather than lifting it, contradicting the lower-friction hypothesis.
- Segmented by engagement tier and traced the loss to high-engagement users (30+ sessions), with negligible movement among casual users.

Smart Project Scheduler — LLM-Assisted Planning Tool

Apr 2026

Python, Claude API, scipy.optimize

- Engineered a Claude API tool converting unstructured project notes into CPM/PERT and linear programming models, removing manual data entry.
- Optimization run returned a \$2,000 cost-minimal path compressing a sample schedule from 25 days to 22.

WORK EXPERIENCE

Kyndryl Solutions Pvt Ltd

Bengaluru, India

Associate Network Support Engineer

Mar 2024 – Dec 2025

- Developed the account's first reporting dashboard in Power BI where none existed, defining the segregation and categorization logic; adopted by leadership for customer delivery reviews.
- Facilitated cross-team resolution calls with network, cloud, and regional leads (~75 engineers); arbitrated triage and escalation decisions across 3 functions.
- Resolved 87% of 2,500+ assigned incidents without escalation over 21 months.

Cameo Global Communications Pvt Ltd

Bengaluru, India

IT Analyst (Cisco Contract)

Sep 2023 – Mar 2024

- Documented a previously untracked fix in ServiceNow, turning a repeat failure into a standing resolution path and cutting recurrence across the support team.
- Queried network and device databases in SQL to isolate root causes of recurring connectivity failures.
- Ranked top 5 of 70+ analysts in customer NPS for 4 consecutive months.

CERTIFICATIONS & LEADERSHIP

Certifications: Google Project Management · Azure AI-102 · Google Analytics 4 · LogicMonitor Certified Associate · Cisco CCNA · CompTIA Security+ · Product Management (Udemy)

Leadership — NMIT (2021 – 2023): VP Public Relations, Toastmasters · VP, Q-Bits Quantum Club (organized India's first national student quantum hackathon) · Team Lead, Cultural Committee
