

UTTKARSH SHARMA

United States | +1 (617) 594-7807 | sharma.utt@northeastern.edu | [LinkedIn](#) | [Portfolio](#)

EDUCATION

M.S., Engineering Management | Northeastern University | Boston, MA Jan 2026 – May 2028
Coursework: Digital Product Design & Management, Advanced Product Management **GPA: 4.0 / 4.0**
B.E., Electrical & Electronics Engineering | Nitte Meenakshi Institute of Technology | Bengaluru, India Aug 2019 – Jul 2023
Coursework: Introduction to Artificial Intelligence, Entrepreneurship Development, Intellectual Property Rights

SKILLS

Product: Discovery, User Research, PRD Writing, RICE Prioritization, Roadmapping, Competitive Analysis, Backlog Management, Requirement Analysis & Problem Framing
Technical & Data: SQL, Python, Power BI, Google Analytics, Excel, RAG Systems, LLM Workflows, APIs
Tools & Process: Jira, Figma, Agile/Scrum, Git/GitHub, Confluence
Collaboration: Stakeholder Management, Cross-Functional Collaboration, Communication

WORK EXPERIENCE

Product Support Analyst | Kyndryl Solutions Pvt Ltd (Kyndryl Bridge) | Bengaluru, India Mar 2024 – Dec 2025

- Traced **24% of onboarding tickets to a single SSO configuration step**; partnered with **Product and Engineering** on a fix and rewrote the setup guide, taking SSO tickets from 80 to 60 a month and those onboarding tickets down **35%** the following month.
- Caught a **post-release regression** when error tickets jumped from 5 to 22 per day, flagging the pattern to Engineering **within 18 hours** of spotting it, rather than letting a release-week spike settle into the standing backlog.
- Built and maintained a signal-tracking process** (recurrence + complexity flags) that separated one-off user confusion from genuine **product gaps**, escalating **5 validated issues into the product backlog** in one quarter, and contributing input on 2 more.
- Surveyed **8 Product and Engineering partners** at quarter-end on the usefulness of my reporting, averaging **4.4 out of 5**.

IT Analyst | New Era Technology (Cameo Global Communications) | Bengaluru, India Sep 2023 – Mar 2024

- Analyzed ticket and usage data to find recurring failure patterns, cutting the **login/access reopen rate from 9% to 4%** in two months.
- Performed root-cause analysis on 12+ recurring incidents**, authoring **RCA reports** that informed engineering and process fixes.
- Delivered weekly and monthly leadership reporting, surfacing recurring issues that prompted a **post-launch rollout fix**.
- Documented **SOPs for 8 common ticket types** to reduce Tier 1 dependency on senior staff.

PROJECTS

Luminary — Cross-University Research Discovery Platform | Team Lead | Protothon 8.0, APMC @ Northeastern Mar 2026
React/Vite, FastAPI, Pinecone, scikit-learn, Groq/Llama-3.3-70b · luminary-lovat.vercel.app

- Led a 4-person team to **1st of 50** by scoping a federated platform that makes in-progress university research discoverable across institutions without raw data leaving the campus that owns it — the constraint centralised competitors fail on.
- Ran **competitive analysis** across 6 existing tools to locate the gap none of them covered, then **RICE-scored scope** against it — cutting P2P messaging (53) in favour of RAG search (146) and QAOA matching (91).
- Defined the **North Star metric** (collaboration requests initiated per month) and an **AARRR funnel** with Phase 1 activation and retention targets, plus tiered B2B pricing benchmarked against Elsevier SciVal and Clarivate InCites at low-to-mid six figures annually.

Spotify Social Layer — PM Case Study | Solo | Portfolio piece, 6-week build May 2026

- Interviewed 4 users** and analysed Spotify's Q1 2026 shareholder deck — 483M free users at 13% gross margin against 293M Premium at 34.8% — to size the conversion gap, where a 2% shift is worth over \$100M a year.
- Designed and **RICE-scored** a 3-feature social layer (Share Templates 147, Milestone Badges 112, Party Queue 108), built 5 Figma screens, and wrote a **PRD targeting +2% conversion lift** within 90 days.

Quantum Computing Simulator — Industry-Partnered Capstone | Team Lead, 6-person team | NMIT Aug 2022 – Jun 2023

- Sourced external industry practitioners and **secured their partnership**, repositioning a standard capstone as a department-level industry collaboration; the external guide was formally credited alongside faculty on submission.
- Owned the **roadmap, work division across 6 contributors, and milestone planning** while managing faculty and industry **stakeholders** whose definitions of a successful outcome were not the same.

Smart Project Scheduler — LLM + Operations Research | Solo | Python, scipy.optimize, Claude API Apr 2026

- Built a Claude API tool parsing unstructured PM inputs into CPM/PERT/LP scheduling models, removing manual data entry; LP optimization found a \$2,000 cost-optimal plan to compress a sample project from 25 to 22 days.

Determinants of Automotive Pricing — Multi-Factor Statistical Study | 4-person team | IE 6200, Northeastern Apr 2026

- Owned the **ANOVA and regression workflow** on a 205-vehicle dataset; one-way ANOVA across 5 body styles ($F = 8.03$, $p < 0.001$) with Tukey HSD, plus a regression showing engine size alone explains **76.4% of price variance** at +\$167.70 per cubic inch.

LEADERSHIP & ACTIVITIES

Vice President | Q-Bits Quantum Club, Nitte Meenakshi Institute of Technology Mar 2022 – Jul 2023

- Organized India's first national student-level quantum computing hackathon**; led club operations and partnerships.
